# *NBCCEDP Has 23 Years of Service*

(Data represents services provided between 1991 and 2011)

In 23 years of service the NBCCEDP has

- Served more than 4.3 million women
- Provided more than 10.7 million breast and cervical cancer screening exams
  - 5.26 million mammograms
  - 5.2 million pap tests
- Diagnosed
  - 56,000 breast cancers
  - 3,200 cervical cancers

# *So much more than screening . . .*

- Systems Change
- Evidence Based Strategies
- Provider Education
- Patient Education
- Appropriateness and Timeliness of Services
- Quality Improvement processes
- Strong, well developed partnerships

# *National Infrastructure In Place*

- Already working with providers on quality improvement
- Each state and several tribes and territories have the infrastructure
- Infrastructure is ready to support genomics education and training.

# *ACA's Program Impact*

- Varies by state
  - Medicaid Expansion, yes or no
- Long term – more focus on quality improvement and systems change
- Example: what are the screening baselines of program contractors?
- How to improve those screening baselines

# *Collaboration Potential*

- The message can be carried by NBCCEDP grantees – to their providers
- This same collaboration could exist within Colorectal Cancer Control Program grantees

# Thank You!!
